

Prescription Drug Affordability

Quick Fact Sheet

What is this?

Small businesses struggle to afford quality health insurance due to high costs, which impacts their ability to recruit and retain staff. A key issue is the excessive price of some prescription drugs. Proposed legislation aims to create a Prescription Drug Affordability Board to evaluate these costly drugs and set Upper Payment Limits (UPLs) across the supply chain.

Why its Important?

The Prescription Drug Affordability Board can help lower premiums by targeting excessively priced drugs, ensuring more affordable coverage. The board will include experts in pharmaceuticals and give the public a voice in drug pricing decisions.
